RESOLUTION XVI

STATISTICS REQUIRED IN HEALTH PROGRAMS

THE XIV PAN AMERICAN SANITARY CONFERENCE,

CONSIDERING:

That health is in itself an indivisible whole, and, moreover, is closely linked to the economic, social, and cultural development of the community;

That public health encompasses all activities concerning the promotion, protection, and preservation of health;

That the disproportion between the magnitude of health problems and the resources usually made available for their solution makes it necessary to classify these problems in proper order, so that they may be dealt with according to their relative importance and the resources utilized in such a way as to yield the maximum returns; and

That basic statistical data are essential to health programs, to ensure their proper planning, development, evaluation, and improvement,

RESOLVES:

To recommend that the Member States, to the extent that their economic, social, and cultural development permits, extend and improve the collection, processing, analysis, and timely publication of statistics on population, vital statistics, morbidity statistics, statistics on health resources and services, and socio-economic statistics related to health.
RESOLUTION XVII

POPULATION STATISTICS

THE XIV PAN AMERICAN SANITARY CONFERENCE,

Considering that a knowledge of the different groups making up the population is of fundamental importance in health programs,

RESOLVES:

To recommend to the Member States that their health agencies:

(a) Promote and cooperate in the provision of timely and reliable demographic statistics;
(b) Participate in the planning of population censuses, so as to ensure that they include the maximum of data essential for health programs; and
(c) Make use of public health surveys, when necessary, to provide additional data on population.

RESOLUTION XVIII

VITAL STATISTICS

THE XIV PAN AMERICAN SANITARY CONFERENCE,

CONSIDERING:

That it is a basic task of health agencies to know, at both the local and the national levels, the vital facts regarding the people whose health problems they wish to solve;
That, among these vital facts, it is particularly important in health programs to have the most thorough knowledge possible of the causes of deaths in the population;
That, for these purposes, there are available detailed international recommendations of the World Health Organization and the United Nations; and
That, nevertheless, vital statistics are still subject to error in collection, inadequate analysis, and delays in publication, all of which interfere with their proper use in the planning, development, evaluation, and improvement of health programs, and with the comparability of data on a national and international scale,

RESOLVES:

1. To recommend that the Member States, through their national agencies, improve the use of:
(a) "Principles for a Vital Statistics System" of the United Nations, stressing the collection and processing of those data that specifically serve the aims of health; and

(b) Regulations No 1 of the World Health Organization, regarding the use of the "International Statistical Classification of Diseases, Injuries, and Causes of Death".

2. To recommend that, in the use of the above, special attention be given to improving the procedures for collection of basic statistical information at the local level.

RESOLUTION XIX

MORBIDITY STATISTICS

THE XIV PAN AMERICAN SANITARY CONFERENCE,

CONSIDERING:

That morbidity statistics are essential in the planning, development, evaluation, and improvement of health programs;

That the collection of this information is a complex process, and the quantity and detail in which it can be obtained depends in large measure on the level of economic, social, and cultural development;

That it is apparent that, in most of the countries, information exists on diseases of certain population groups, such as hospital statistics, data on insurance against illness, accidents, industrial hazards, etc., which should be developed, standardized, and utilized;

That a thorough description of the importance, type, sources and uses of morbidity statistics is contained in the Third Report of the Expert Committee on Health Statistics of the World Health Organization; and

That to cover the special group of communicable diseases—a complete and timely knowledge of which is of local, national, and international importance—there are legal provisions in the various countries and detailed international recommendations. In spite of which these statistics still suffer from inaccuracy, and the provisions regarding their transmittal and publication are not complied with fully,

RESOLVES:

1. To recommend that the Member States promote utilization of general morbidity statistics for the purposes of health programs, and that they take permanent measures to comply with the recommendations of the Third Report of the Expert Committee on Health Statistics of the World Health Organization.

2. To recommend that the Member States take immediate steps to improve the reporting of communicable diseases, through the use of:
(a) Regulations No 2 of the World Health Organization (International Sanitary Regulations);
(b) "Basic Procedures for the Reporting of Communicable Diseases" (Scientific Publications, No 8, Pan American Sanitary Bureau); and
(c) "Guide for the Reporting of Quarantinable and Other Communicable Diseases in the Americas" (Miscellaneous Publications, No 5, Pan American Sanitary Bureau).

RESOLUTION XX

STATISTICS ON RESOURCES AND SERVICES

THE XIV PAN AMERICAN SANITARY CONFERENCE,

CONSIDERING:

That health programs require a knowledge of the economic resources and resources in personnel and equipment, both public and private, that the country provides specifically for such programs;
That an evaluation of the yield and cost of public health programs is of basic importance, and that, for this purpose, statistics on resources and on services provided are indispensable; and
That, in spite of their importance, statistics of this type have not been developed sufficiently in the majority of the American countries,

RESOLVES:

To recommend that the Member States take measures to obtain statistics on the national resources devoted to health and on the services rendered to the community, so that this information may facilitate the planning, development, evaluation, and improvement of health programs.

RESOLUTION XXI

SOCIO-ECONOMIC STATISTICS RELATED TO HEALTH

THE XIV PAN AMERICAN SANITARY CONFERENCE,

CONSIDERING:

That there is a close interdependence between the economic, cultural, and social development of the community and its health problems;
That health programs should, therefore, form part of a comprehensive governmental plan for the improvement of the living conditions of the population;
That those in charge of health programs should have available socio-economic statistics to help give them an over-all view of the problems confronting the community; and
That, despite the fact that information of this type exists in the majority of the countries, it is not used sufficiently by the health agencies,

RESOLVES:

To recommend that the Member States promote the use by health agencies of socio-economic statistics related to health, in order to unify the activities designed to raise the living standards of the population.

RESOLUTION XXII

STATISTICAL SERVICES IN HEALTH ADMINISTRATIONS

THE XIV PAN AMERICAN SANITARY CONFERENCE,

CONSIDERING:

That some of the basic statistical data required by health administrations should be subject in those administrations to such a system of collection, processing, and analysis as will ensure their constant and timely use in the planning, development, evaluation, and improvement of health programs;

That, in addition to the statistical information mentioned above, use should be made of the statistical data produced by other national administrations; and

That, if health programs are to make proper use of statistical data, statisticians having a basic knowledge of health must collaborate closely with those who conduct such programs,

RECOMMENDS:

1. That the Member States create, or stimulate and strengthen, the statistical services in health administrations, providing them with material facilities and adequately trained statistical personnel.

2. That, in order to coordinate the various administrations producing statistics of health interest, the Member States promote the establishment and development of National Committees on Vital and Health Statistics, in accordance with the Report of the First International Conference on National Committees on Vital and Health Statistics.

3. That, in order to produce reliable basic data essential for vital statistics, local coordination be established between health services, civil registration, and statistical services.
RESOLUTION XXIII

DISSEMINATION AND TEACHING OF STATISTICS APPLIED TO HEALTH

THE XIV PAN AMERICAN SANITARY CONFERENCE,

CONSIDERING:

That to improve the reliability of the statistical data needed in the planning, development, evaluation, and improvement of health programs, it is necessary to train the professional workers for such programs (physicians, nurses, sanitary engineers, social workers, health educators, etc.) in statistical methods and their application to health;

That, to the same end, it is equally necessary that the technical knowledge of statistical personnel be increased; and

That it is advisable to stimulate the progressive development of a trained group of statisticians and statistical officials,

RESOLVES:

1. To recommend that the Member States, with respect to professional health workers:

(a) Include in the curriculum of the schools of medicine, nursing, social work, etc., the teaching of statistical methods applicable to health; and

(b) Orient the teaching of statistics given in schools of public health toward their practical application in health programs.

2. To recommend to the Member States that, with respect to officials in statistical services and according to national needs, they carry out teaching programs on the following levels:

(a) University courses for education of statisticians, with a foundation in mathematics and specialization in various fields, including health;

(b) Graduate courses for health statisticians who already have completed their undergraduate university education;

(c) Courses at an intermediate level in the schools of public health for employees in statistical services who have completed secondary education; and

(d) In-service training for employees who work in local or central offices in the collection and utilization of original statistical data.

3. To recommend to the Member States that they establish a professional statistical career, in which there is provision for proper classification of positions and adequate salaries.
4. To recommend to the Member States that they stimulate teamwork of professional health workers and statisticians, so as to encourage the application of statistical methods in health programs and clinical research.

RESOLUTION XXIV

SUMMARY OF REPORTS OF THE MEMBER STATES FOR 1954-1957

THE XIV PAN AMERICAN SANITARY CONFERENCE,

CONSIDERING:

That the "Summary of Reports of the Member States 1950-1953", prepared by the Pan American Sanitary Bureau, is a valuable document for providing knowledge of the health problems of the Americas and for coordinating health programs, inasmuch as it contains statistical data on population, births, deaths, cases of communicable diseases, personnel and organization of health services, and description of programs; and

That it is evident that the data in these reports are not strictly comparable, because of differences in definitions and procedures followed by the various countries,

RESOLVES:

To recommend that the Member States:

(a) Immediately begin the improvement of these statistical data, in accordance with the recommendations of international organizations; and

(b) Agree to increase the statistical information that their reports to the next Pan American Sanitary Conference should contain, and decide upon the procedures for obtaining such information and the methods for ensuring international comparability, with the active cooperation of the Pan American Sanitary Bureau and through seminars and other activities for the exchange of ideas and procedures.

RESOLUTION XXV

METHODS OF IMPROVING THE RELIABILITY OF RAW STATISTICAL DATA REQUIRED FOR HEALTH PROGRAMS

Having noted the proposal of the Delegation of Cuba, that “at the time the Pan American Conference of Public Health takes place, the Inter-American Congress of Public Health will hold an official meeting, which will be organized by the Pan American Office of Public Health”,

RESOLVES:

To postpone consideration of the proposal presented by the Delegation of Cuba until the X Meeting of the Directing Council, scheduled for 1957.

RESOLUTION XXXVII

THE XIV PAN AMERICAN SANITARY CONFERENCE,

Having examined Document CSP14/22, submitted by the Director of the Pan American Sanitary Bureau, at the request of the Director-General of the World Health Organization,

RESOLVES:

To take note of Resolution 53 adopted by the Seventh World Health Assembly and Resolution 21 of the Fourteenth Session of its Executive Board, dealing with environmental sanitation.
RESOLUTION XXXVIII

PLACE AND DATE OF THE XV PAN AMERICAN SANITARY CONFERENCE

THE XIV PAN AMERICAN SANITARY CONFERENCE,

Taking into account the terms of Article 7-A of the Constitution of the Pan American Sanitary Organization,

RESOLVES:

To express its appreciation to the Government of the United States of America, and to accept its invitation to have the XV Pan American Sanitary Conference held in the city of San Juan, capital of the Commonwealth of Puerto Rico.

RESOLUTION XXXIX

POLICY ON ACCEPTING AMENDMENTS TO THE CONSTITUTION OF THE PAN AMERICAN SANITARY ORGANIZATION

THE XIV PAN AMERICAN SANITARY CONFERENCE,

Considering that Article 25 of the Constitution provides that "The Conference or the Directing Council may approve and put into force, in accordance with policies which they may determine, amendments to this Constitution",

RESOLVES:

That the approval of the proposed amendments to the Constitution recommended by Committee II of this Conference shall require the affirmative vote of a two-thirds majority of those participating governments entitled to vote that are represented and present when the vote is taken by the Conference in plenary session.

RESOLUTION XL

CONSTITUTION OF THE PAN AMERICAN SANITARY ORGANIZATION

THE XIV PAN AMERICAN SANITARY CONFERENCE,

Having examined the final report of the Permanent Committee on Revision of the Constitution of the Pan American Sanitary Organization (Document CSP14/18 and Annex A); and

Taking into account the modifications proposed by the ad hoc Working Party of Committee II presented in Document CSP14/78, and the modifications introduced by Committee II (Document CSP14/85, Rev. 1),

RESOLUTION XLI

TREPONEMATOSES

THE XIV PAN AMERICAN SANITARY CONFERENCE,

CONSIDERING:

That the treponematoses are still important in many countries of the Continent as infecto-contagious diseases;
That many people in the Americas are still suffering from some of the treponematoses in a contagious phase;
That the transmission of the treponematoses is effected only by human beings, and therefore the campaign against the propagation of these diseases is limited exclusively to man; and
That it is necessary to take all measures to encourage the prophylaxis and control of the aforesaid diseases, through concrete and basic preventive programs,

RESOLVES:

1. To recommend that the Member States, in accordance with their possibilities, resources, and conditions, develop medico-preventive programs, based on the use of penicillin or the application of methods or techniques that science may recommend in the future for the control and eradication of these diseases.
2. To recommend that, inasmuch as experiments in mass treatment with penicillin have proved successful in endemic areas of yaws, this procedure be applied to achieve eradication.

RESOLUTION XLII

ERADICATION OF MALARIA IN THE AMERICAS

THE XIV PAN AMERICAN SANITARY CONFERENCE,

CONSIDERING:

That in the course of the technical discussions on the topic “Eradication of Malaria in the Americas” it was made evident that:

(a) The experience of those countries that have achieved eradication of malaria shows that, once transmission is intercepted, the infection in human beings disappears within a few years, as the result of the natural death of the parasite;
Recent observations indicate the development of resistance by some anopheline species to certain insecticides, a phenomenon that, in time, may cause serious difficulties and even failures in antimalaria campaigns; and

c. The eradication of malaria in some countries calls attention to the international problem of preventing the importation of new cases into areas already free from infection.

RESOLVES:

1. To declare that it is of the utmost urgency to carry out the terms of Resolution XVIII of the XIII Pan American Sanitary Conference, which recommends that the Pan American Sanitary Bureau promote the intensification and coordination of antimalaria work, with a view to achieving the eradication of this disease in the Western Hemisphere; and that the Member Governments should convert all control programs into eradication campaigns within the shortest possible time, so as to achieve eradication before the appearance of anopheline resistance to insecticides.

2. To instruct the Pan American Sanitary Bureau to take steps to implement the aforesaid resolution and to study international measures to ensure the protection of those countries or territories that have achieved eradication of the disease.

3. To authorize the Director of the Pan American Sanitary Bureau to secure the financial participation of public or private organizations, national or international, in order to further the aims set forth in this resolution.

RESOLUTION XLIII

UTILIZATION OF FUNDS FOR THE INTENSIFICATION OF ANTIMALARIA ACTIVITIES

THE XIV PAN AMERICAN SANITARY CONFERENCE,

Bearing in mind the resolution on eradication of malaria in the Americas, approved at the present meeting; and

Considering that it is necessary to provide the Pan American Sanitary Bureau with the financial resources that will enable it to carry out the functions assigned to it by the aforesaid resolution,

RESOLVES:

1. To authorize the Director of the Pan American Sanitary Bureau to obligate up to $100,000 of the surplus funds available as of 31 December 1954 for the intensification of the antimalaria activities of the Bureau designed to eradicate this disease in the Western Hemisphere.

2. To approve the preparation by the Executive Committee of a proposed budget for 1956, for consideration by the Directing Council, to include an increase of $100,000 over the present budgetary level, this increase to be allotted specifically for the intensification of the antimalaria activities of the Bureau.
